

Bubbles, Bubbles, Bubbles

Let's put you in a bubble!

Don't forget to wear a lab coat and goggles.

Make your own bubble wand

Can you make a bubble wand with pipe cleaners and a straw?

What shape bubble do you get if you use a square or triangle shaped wand?

Can you see a rainbow in the bubbles?

This is because when light from the sun passes through the bubble it is split into the different colours that make up sunlight.

Can you name the colours of the rainbow?
