

# WEEKLY CHALLENGE

## BUILD A BRIDGE

Bridge building is a brilliant activity with almost endless possibilities. Can you build a bridge using just straws? Or, how about a bridge that can hold a certain weight?

### What do you need:

Building blocks  
Craft or lollysticks  
String  
Other craft materials

## Instructions

1. First create a skeleton for your bridge. We used building blocks and string.
2. Use lollysticks or craft sticks to complete the bridge.
3. Test your bridge for strength.
4. How else can you build a bridge? can you build a strong bridge using just one material?

can you make a giant bridge?.
