

ICE PAINTING

You'll need:

A shallow tray

Water

Water based paint

Paintbrush

Instructions

Pour water into the tray so the bottom of the tray is completely covered.

Place in the freezer until frozen.

Carefully remove the tray from the freezer (ask an adult to help) and leave to melt a little so the surface is no longer sticky.

Paint over the top of the ice, wipe clean and paint again!

Questions to ask

How does it feel to paint over the ice?

What happens to the paint as the ice starts to melt?

Challenge

Try pressing paper over your icy picture and leave it to dry!

ALWAYS ASK AN ADULT TO HELP!
