

BUBBLE SNAKE

You'll need:

- Small tube or plastic bottle
- Bubble mix
- Old cloth or sock for the end
- Scissors
- Elastic band

Instructions

Cut the bottom off the bottle - ask an adult to help and be careful as the ends might be sharp.

Cover the end of the bottle with a piece of cloth and secure tightly with an elastic band.

Dip the cloth end of the bubble snake into bubble mix.

Blow carefully down the other end of the bottle and watch as a bubble snake appears!

Why does this work?

When you blow air through your bubble maker, hundreds of tiny bubbles are created. The bubbles stick to each other creating a long stream of bubbles.

Extra Challenge

Can you find any rainbows in the bubbles?

Can you make your own bubble mix?
