

ICE EXCAVATION

You'll need

Small containers

Water

Freezer

Small plastic figures
or toys

Droppers - optional

Instructions

Add water and your characters or small objects to a shaped mould or container.

Place in the freezer for a few hours.

Remove from the freezer once frozen and leave for a few minutes to melt a little. If you try to remove the ice straight away it'll stick to your fingers, so take care!

Use a pipette or dropper to drip warm and cold water onto the ice. Which melts it the fastest?

CAN YOU MAKE A GIANT VERSION?
