

SCIENCE SPARKS SNIPPETS

PAPER BASED ACTIVITIES AND EXPERIMENTS

Paper has been made from many materials over the years, including wood pulp, rice and clothes. Today paper is made from mostly leftovers from saw milling and recycled paper products.

Paper can be used for lots of different science activities, and once you're finished it can be recycled meaning there's no waste!

How many different uses of paper can you list?

Did you know recycling 1 ton of paper saves 17 trees?

It takes 70% less energy to recycle paper than it does to make it new from raw materials.

Make a newspaper shelter using rolls of paper and tape.

Learn about strong shapes

Draw around yourself and add body parts
