

FLYING ELF HATS

You'll need

Paper or card
Felt tip pens
Scissors
Milk container
Tape

Empty milk
container

Elf hat

Instructions

Create a cone elf hat with the paper and tape.

Place the hat on top of the milk container.

Use both hands to squeeze the milk container and watch as the hat shoots up into the air!

When you squeeze the bottle, the air inside is forced out through the top. The force of the air against the cone sends it shooting upwards. The harder you push the sides of the bottle together, the greater the force of the air leaving the bottle and the higher the cone will fly!
